

PORTFOLIO

► HELLO!

My name is Oleg Bekker.
I am a communication designer **specializing**
in 3D animation **and** XR design.

My passion lies in combining technology
and art **to create** immersive worlds **and**
moving imagery.

With experience as a freelancer, tutor, **and in**
interdisciplinary teamwork, **I combine technical**
expertise **with** artistic sensitivity.

PROJEKTE

► **ABRAXAS** — DIGITAL STAGE DESIGN

► **THE DOOR** — VIRTUAL REALITY INSTALLATION

► **SPIRIT OF SACRIFICE** — CORPORATE IDENTITY

► **LICHT DER WELT** — VIRTUAL REALITY EXPERIENCE

► **SEMBILAN MATAHARI** — PROJECTION MAPPING

ABRAXAS

► DIGITAL STAGE DESIGN NARCISSUS AND GOLDMUND — BLENDER — 2024

Abraxas is a **3D animated** interpretation of a key moment from **Hermann Hesse's** Narcissus und Goldmund. The work explores the tension between rationality (**Narcissus**) and sensuality (**Goldmund**) in the form of a digital stage design.

The projection was shown on the large-format media wall at Düsseldorf University of Applied Sciences and addresses the union of both principles in the symbol of **Abraxas**. Technically realized in **Blender (Eevee)**, with a focus on light, movement, and symbolic geometry.

► VIRTUAL REALITY INSTALLATION BACHELOR — UNREAL ENGINE — 2025

The Door is an **immersive** VR installation that explores the theme of thresholds **and** shifts in perspective. A **real-world tracked door** serves as a **physical** interface **between** reality **and** virtuality, allowing viewers to enter four different worlds: Childhood, Relation, The Liminal, and Stratos.

Each of these environments combines spatial design, sound, and symbolism to create a unique emotional experience. The project blurs the boundary **between** viewer **and** work, making perception itself the **central** experience.

► STREETWEAR BRAND CORPORATE IDENTITY — PRODUCTION — 2023

Spirit of Sacrifice is my streetwear brand, founded in Düsseldorf and Cologne in 2023, which combines hip-hop, techno, and minimalism in a sustainable design language.

The project was developed in close collaboration with Kilian Lindner and includes the complete visual design on my part – website, photography, video, animations, and T-shirt design.

The brand combines raw, subcultural aesthetics with conscious design and values transparency, quality, and responsibility.

► VIRTUAL REALITY EXPERIENCE BLENDER — PROCEDURAL — 2022

This VR experience **depicts the** development **of human** technology **as an abstract** journey – **from** nature **to** industry **and the** digital world **to** virtuality.

The work was created in the seminar Ans Licht der Welt kommen taught by Prof. Stefan Asmus **and** Prof. Markus Pasing, in **collaboration with** Timon Peters.

As a starting point **for our work, we chose a** quote **from the French philosopher** Paul Virilio (**Rasender Stillstand, 1992**):

„If the sphere of human activity is no longer limited by the extent, duration, or even the opacity of the obstacles blocking its path, where then can its presence in the world, its real presence, actually be located?
It is certainly tele-present, but where? From what place, from what position?
Living here and there at the same time: where am I when I am everywhere?“

CINEMATIC RENDERINGS

► PROJECTION MAPPING TEAMWORK — INTERNATIONAL — 2024

During my internship at the Indonesian design studio
➤ **Sembilan Matahari** in Bandung, I worked on several
large-scale projection mapping **projects that combine** architecture
and moving images.

The works translate narrative **and** emotional concepts **into**
monumental light installations **and** **showcase the creative process**
from the initial 3D idea to the final projection in public spaces.
